Linköping, Sweden, February 9, 2009

Sectra enters the Greek market

The Swedish IT and medical-technology company Sectra has signed a distribution agreement with the Greek company Proton S.A., a provider of medical imaging and security systems based in Athens.

Through this partnership, Proton becomes a distributor of Sectra's medical systems in Greece and Cyprus. The agreement includes all of Sectra's products within medical systems.

"With Proton's large customer base within radiology and existing sales and service network, we could not look for a better partner," says Torbjörn Kronander, President of Sectra Imtec AB. "Proton has solid experience with products similar to Sectra's, and this will significantly reduce the time for us to gain traction in the Greek market," he continues.

In the near term, Proton will focus on sales of Sectra's digital mammography system, Sectra MicroDose Mammography and Breast Imaging PACS (Picture Archiving and Communication System). The market for digital mammography in Greece is rapidly growing, with an increased awareness of the benefits of mammography in general and low-dose mammography in particular.

"The demand for digital mammography is growing in Greece," says George Papaetis, President of Proton S.A. "With Sectra MicroDose Mammography, we can provide our customers with a highly efficient solution for mammography screening, at half the dose of competing systems. Moreover, we are positioning ourselves well for the expected increase in digitization of radiology, with an outstanding PACS solution in our offering," he adds.

About Proton S.A.

Proton currently sells and services imaging systems within x-ray, endoscopy and ultrasound, but also has a product division focused on security systems such as freight container scanning. Proton has its headquarters in Athens and branch offices in Thessaloniki and Cyprus. The company was founded in 1992 and has since then experienced steady growth.

About Sectra's medical operations

Sectra develops and sells IT systems and products for radiology, mammography and orthopedic departments. More than 1,000 hospitals worldwide use the systems daily, together performing over 45 million radiology examinations annually. This makes Sectra one of the world-leading companies within systems for handling digital radiology images. In Scandinavia, Sectra is the market leader with more than 50% of all film-free installations. Sectra's systems have been installed in North America, Scandinavia and most major countries in Europe and the Far East.

About the Sectra Group

Sectra successfully develops and sells cutting-edge products in the expansive niche segments of medical systems and secure communication systems. The company was founded in 1978 and has its roots in Linköping University in Sweden. Today, Sectra has offices in eleven countries and operates through partners worldwide. Sales in the 2007/2008 fiscal year totaled SEK 743 million. The Sectra share is quoted on the NASDAQ OMX Stockholm AB exchange. For more information, visit www.sectra.com.
